

Garage + outbuilding · low hip cap / one window

16" north / west cap projection · white balcony / walkway · integrated solar with matching non-active infill

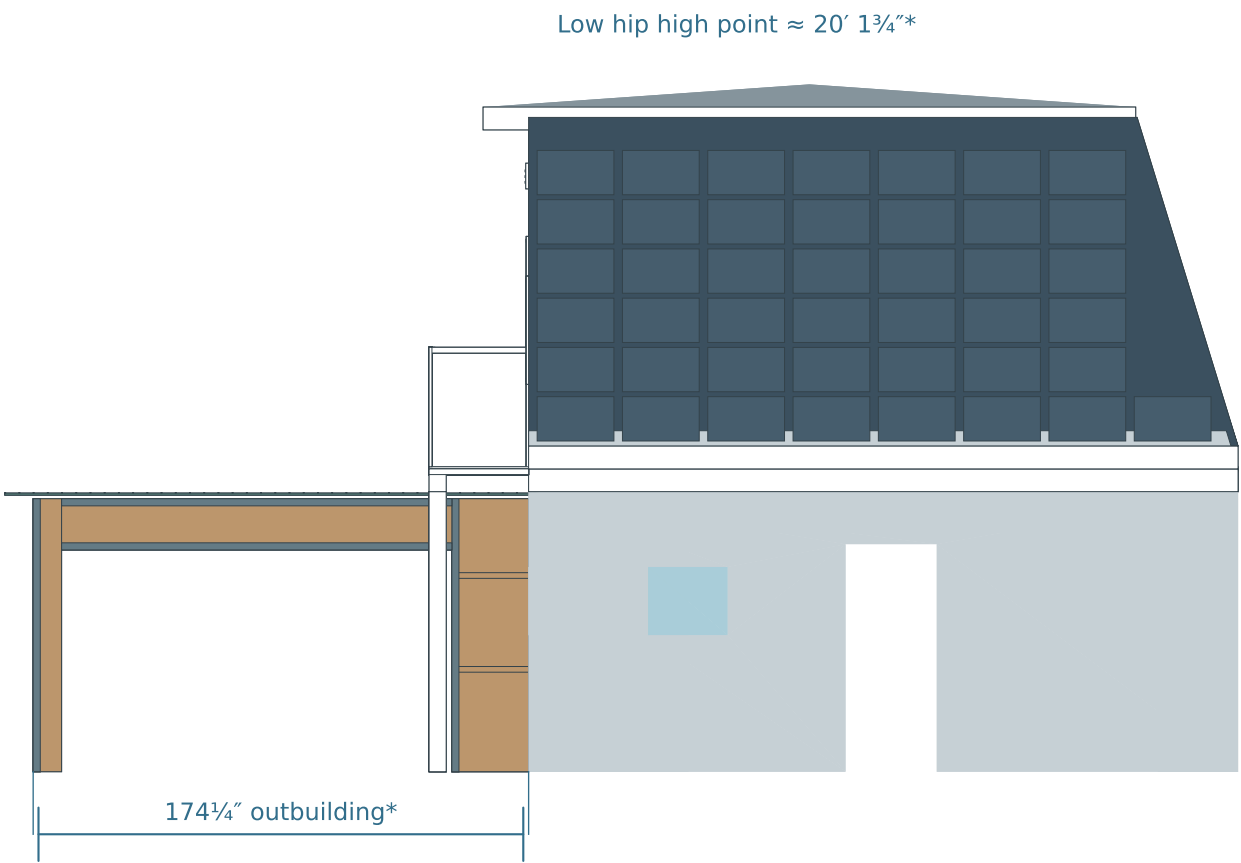

01 Southwest orthographic perspective

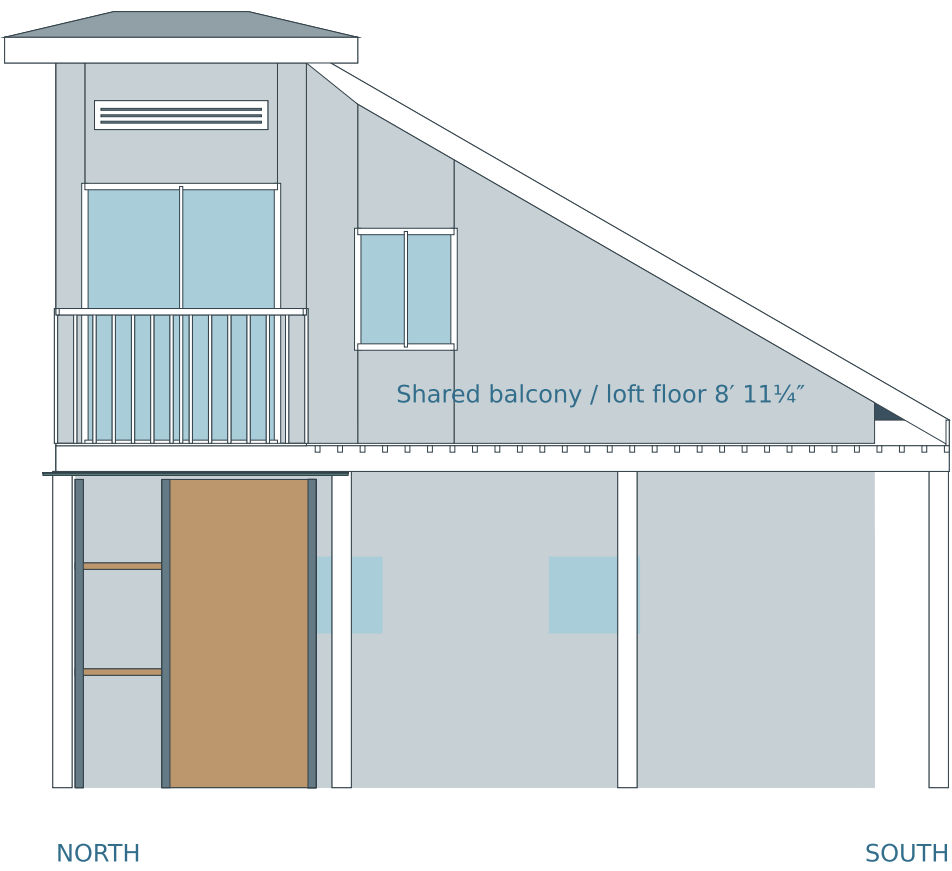

02 Roof plan · north up

03 South elevation · looking north

04 West elevation · looking east

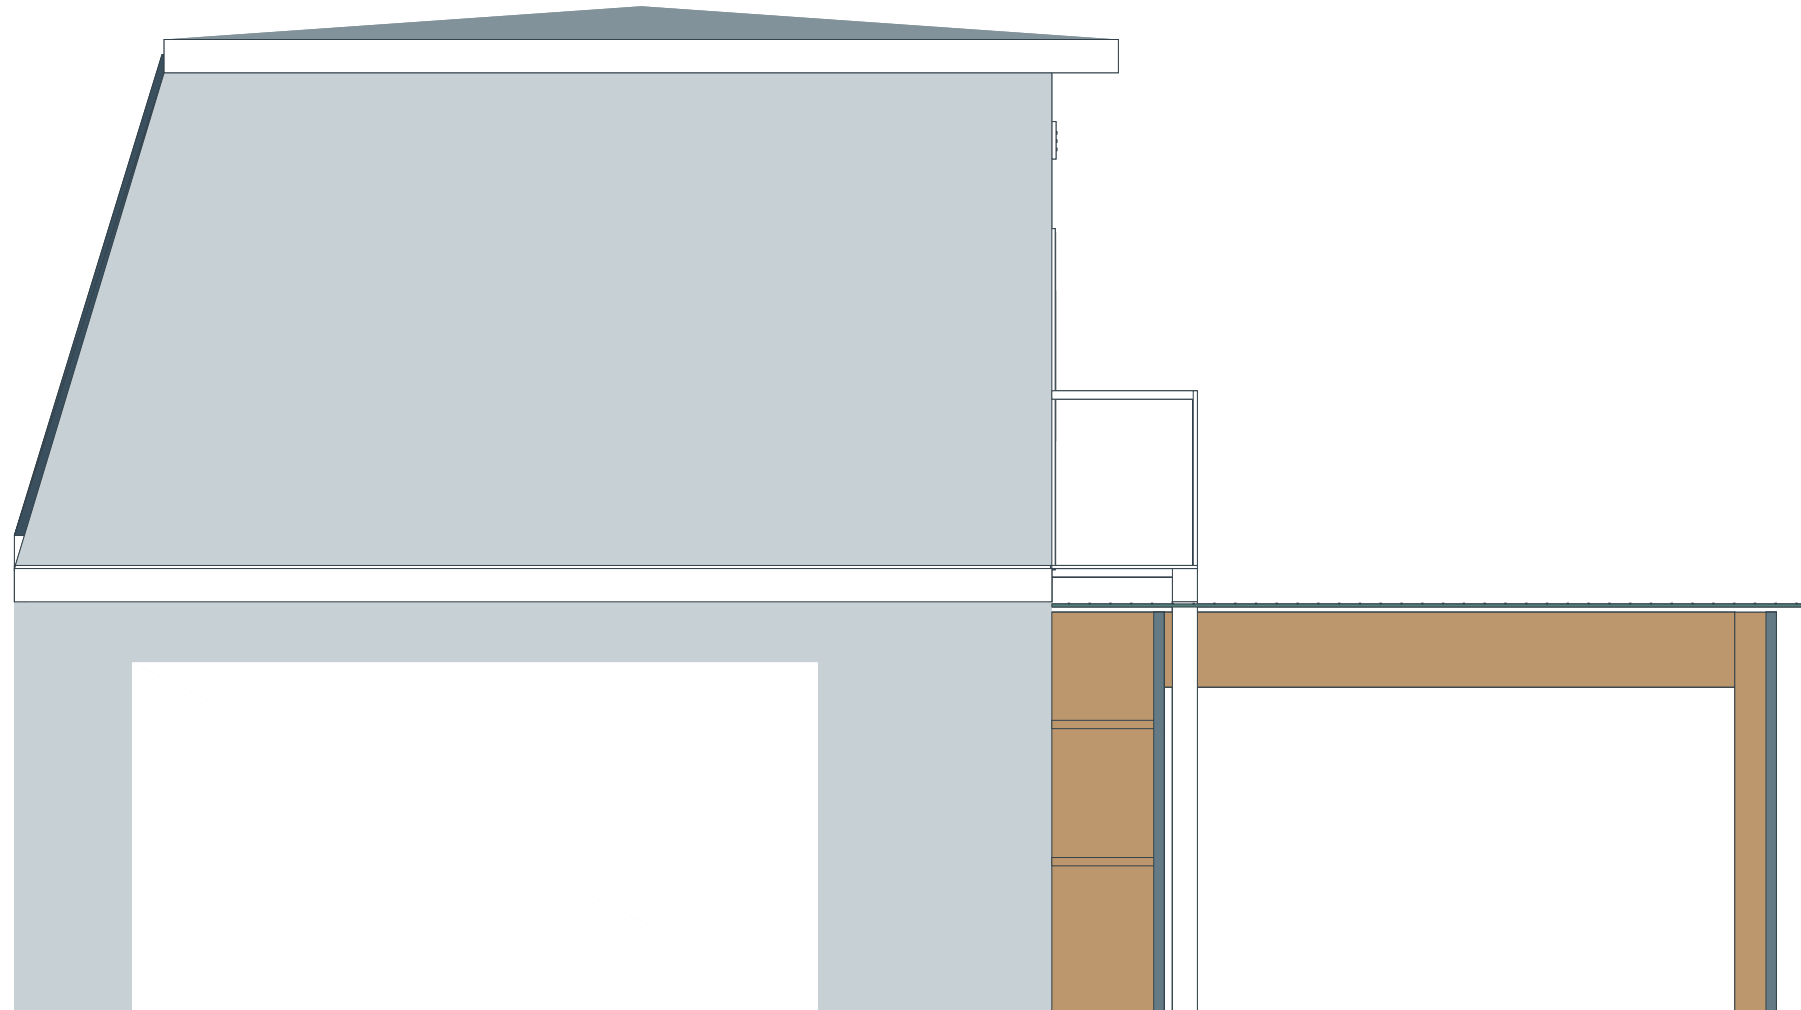

* Study geometry: outbuilding heights/grade remain approximate. Hip rise 8", ridge and roof junctions are provisional; east edge has no added overhang.

Solar joints and infill are illustrative. Existing outbuilding roof remains below the balcony; separation and connections are not verified.

Garage + outbuilding · third elevation

05 North elevation · looking south

North garage-door opening retained. Low hip / east-face transition is a concept pending detailed roof development.
