

1 · Projecting shallow cap and layered cornice

WEST ELEVATIONS · both window options retained · white walkway / balcony below

A · One window south of the balcony

B · Three small windows following the slope

A: one 30" × 36" window.
B: three 18" squares stepping down with the solar slope.

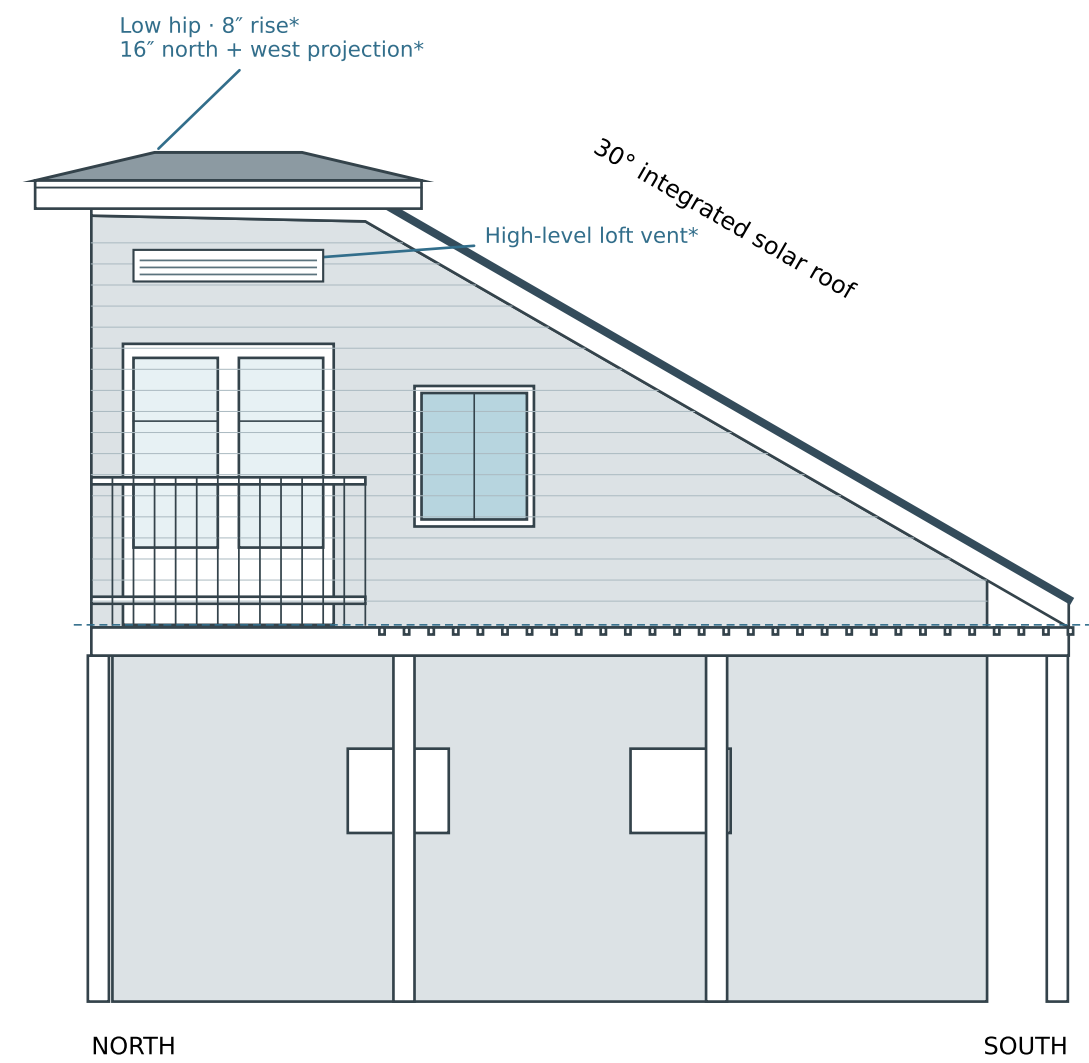

* New cap, vent and trim dimensions are exploratory.
Overhang on north and west only; east setback edge stays tight.

Loft louvers shown as a concept; pair with controllable inlet openings. Roof-cavity ventilation is a separate system design.

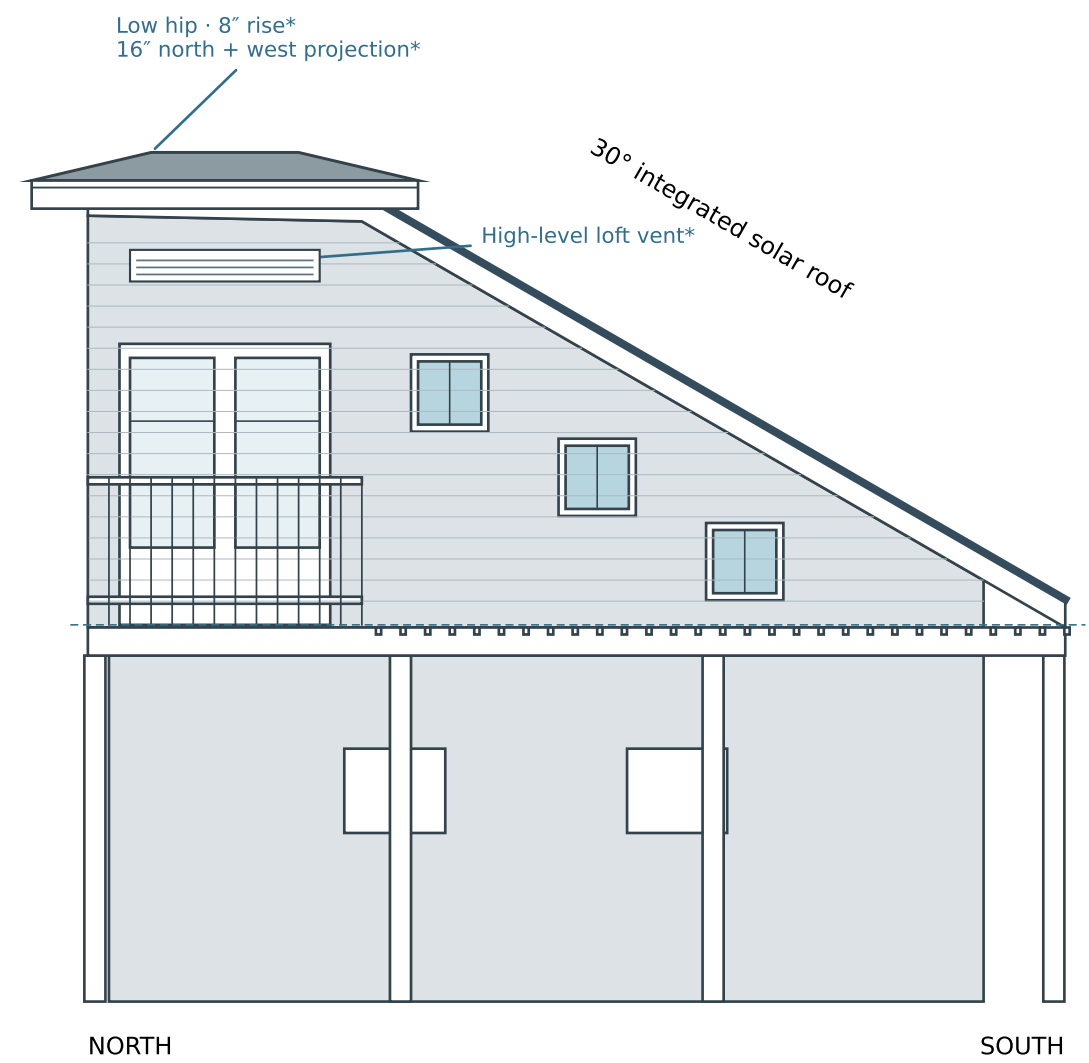

2 · Low hipped cap and projecting soffit

WEST ELEVATIONS · both window options retained · white walkway / balcony below

A · One window south of the balcony

B · Three small windows following the slope

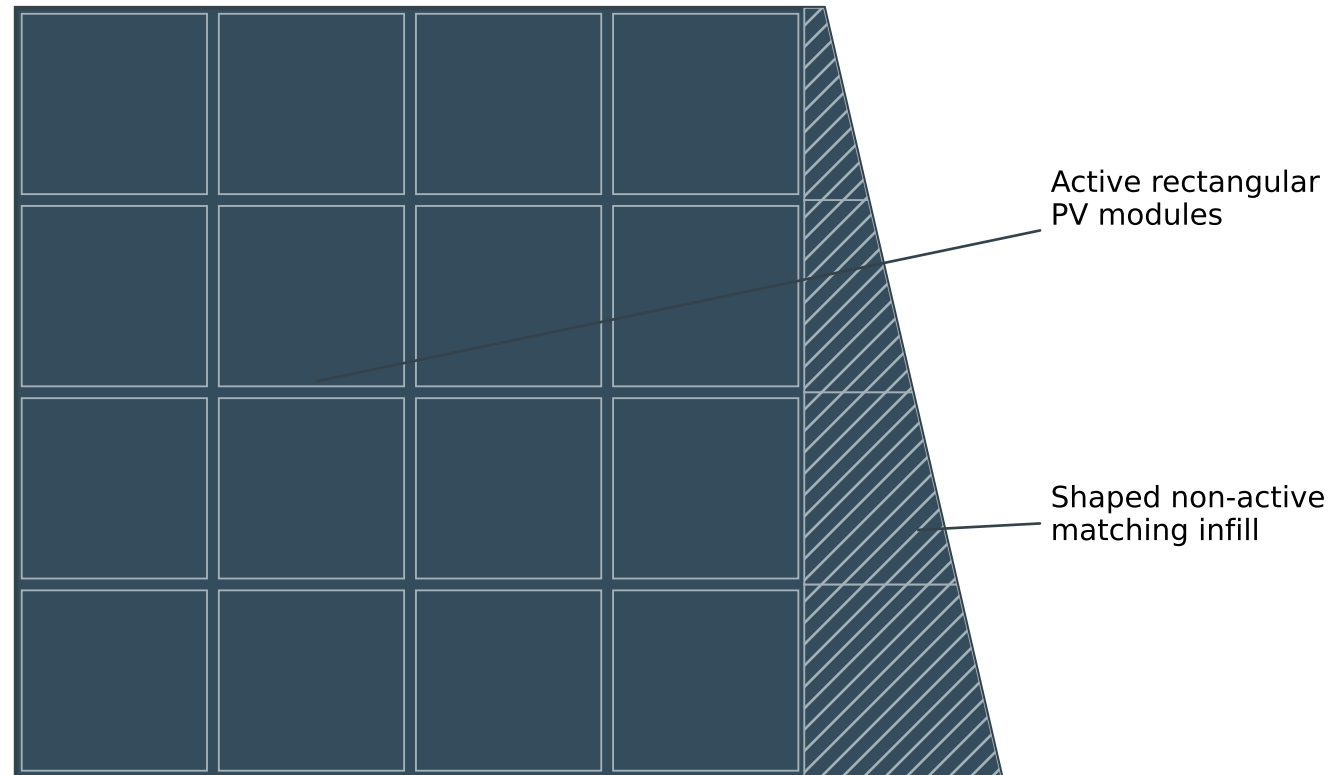

A: one 30" × 36" window.
B: three 18" squares stepping down with the solar slope.

* New cap, vent and trim dimensions are exploratory.
Overhang on north and west only; east setback edge stays tight.

Loft louvers shown as a concept; pair with controllable inlet openings. Roof-cavity ventilation is a separate system design.

One glossy roof surface · two panel types

Diagram in the roof plane · illustrative joints, not a panel schedule

Hatching identifies infill in this drawing only; installed finish should match in color and gloss.

Custom infill material, glazing, attachment and flashings TBD; active modules remain uncut.
