

West loft wall · window alternatives

White balcony / walkway and flat-cap roof retained · Looking east: north left, south right

A · One window south of the balcony

B · Three small windows following the slope

A: 30" × 36" opening; sill 30" above loft floor.
A single window keeps the wall simple and relates to the French doors.

B: three 18" × 18" openings; sills 57", 33" and 9" above loft floor.
The stepped arrangement fits the descending roof; the last window is low.

All new window sizes and positions are design trials. Openings fit the drawn roof profile; framing, glazing and operability are not specified.
