

# Existing outbuilding · dimension check

PLAN + ELEVATIONS / Dimensions in inches / Standalone survey draft for review

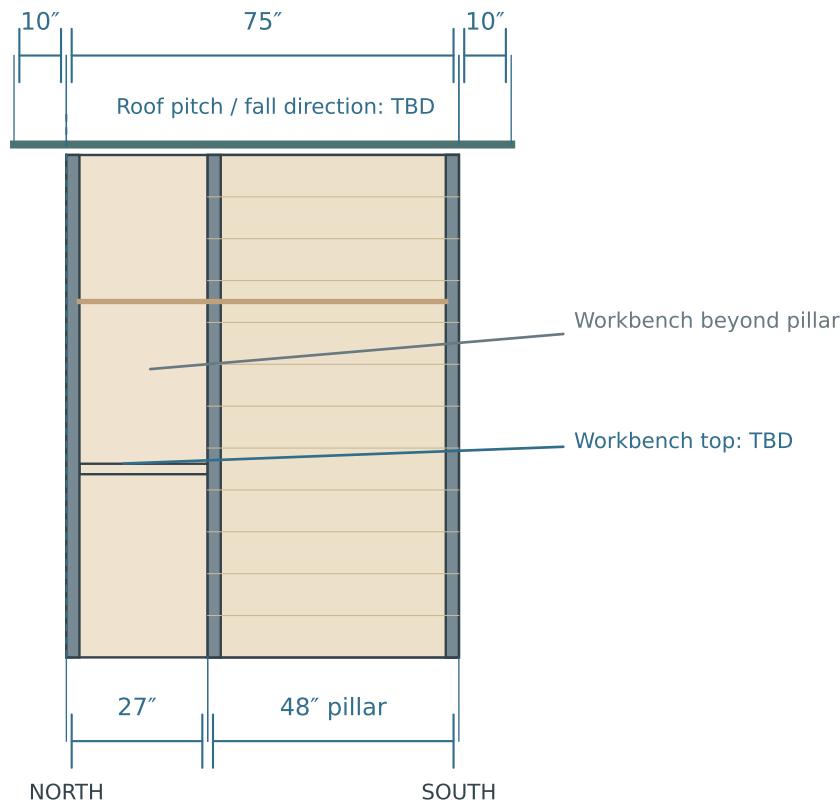

01 PLAN · north up

02 SOUTH / FRONT ELEVATION · looking north

03 WEST ELEVATION · looking east

## MEASURED / USER-SUPPLIED

Workbench: 27" E-W x 75" N-S, against garage west wall.  
Workbench north end aligns with garage north wall.  
Electrical pillar: 10" E-W x 48" N-S; south faces align.  
Connecting beam: 137 1/4" long x 18" high x 2 1/2" deep.  
Beam frame: 2 1/2" x 2 1/2" tube; tube wall thickness unknown.  
Other main supports: 2 1/2" x 2 1/2" x 1/4" steel angle.  
Roof framing: 3/4" rectangular steel tube; other section dimension / wall thickness / spacing not supplied.  
Roof panels: corrugated plastic; three 10" overhangs.

## CHECK BEFORE COMBINING WITH GARAGE

\* Beam drawn between inner faces of the two supports.  
Result: 174 1/4" overall width; 184 1/4" roof width.  
Roof east edge drawn meeting garage wall; confirm.  
Overall height, beam-bottom height, bench-top height and roof pitch are unmeasured. Vertical positions are schematic; only the 18" beam height is dimensioned.  
Beam south face taken flush with both support faces.
