

Corrected roof shape and T-E support arrangement

Looking west at the east side • full existing roof outline, with T-E section dotted

Plan • no new interior post under T1

NORTH ↑

Existing roof: single-point pyramid, no ridge segment. Footprint retained at 249.5 × 249 in pending dimension reconciliation. Green truss uses the earlier 36-in envelope for illustration only; it has not been sized for T1's transferred load. Eaves remain unmeasured.
