

A · 30° solar roof + shallow rear cap

GARAGE ROOF STUDY / Ground datum = 0' 0" / Loft headroom measured to underside of roof

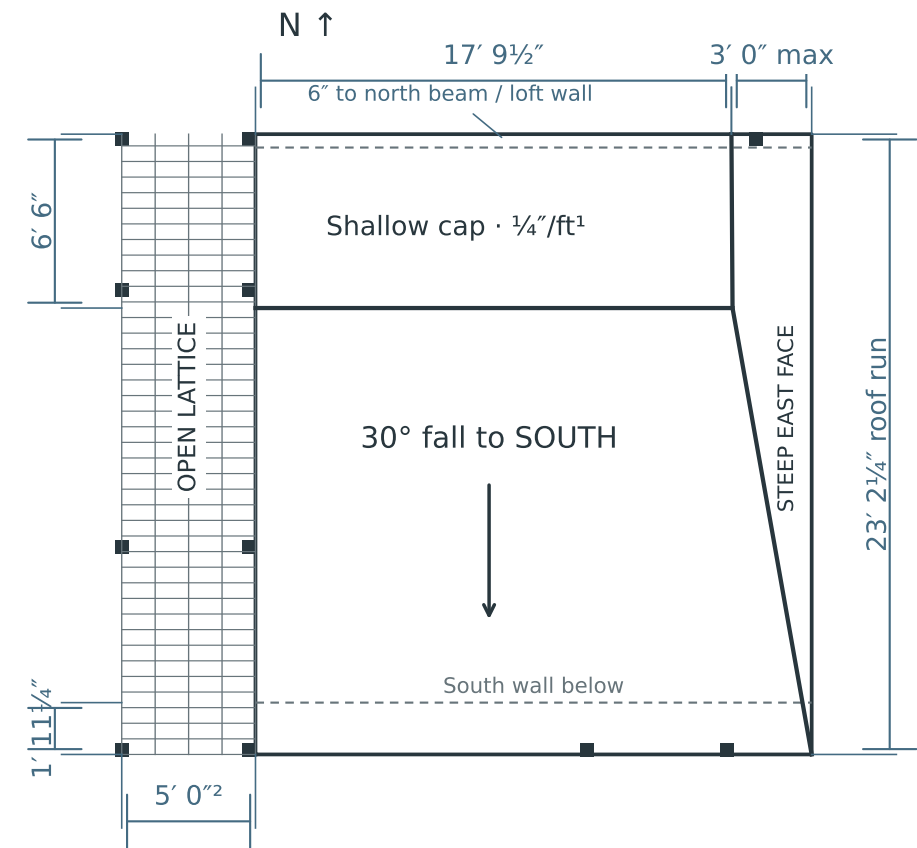

North roof top 19' 3¾" • Rear clear height 9' 8½" • 8 ft+ zone: 9' 2¾" deep • 6 ft+ zone: 12' 8¼" deep

01 Southwest perspective

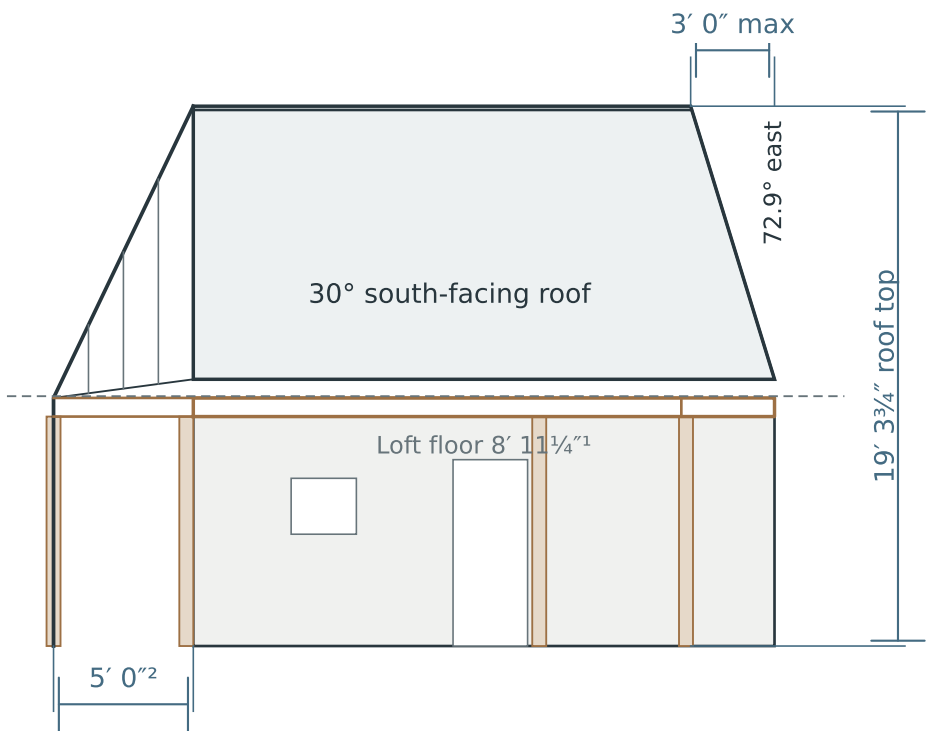

SOUTH: entry + window / WEST: open lattice

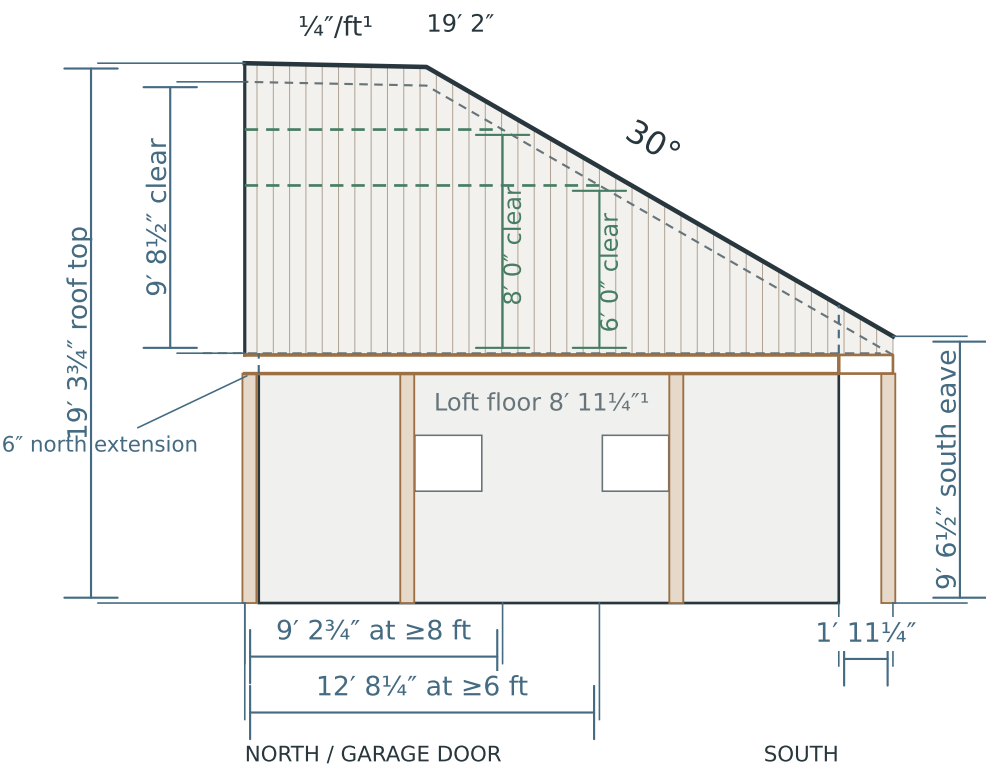

02 Roof plan · north up

03 South elevation · looking north

04 West elevation · looking east

¹ ASSUMED BUILDUP: 8' 2½" wall + 8" beam + ¾" deck → 8' 11¼" loft floor. Roof depth shown as 8" vertical; not sized.

² WEST: 5' 0" from wall to outboard post centerline. Lattice 2x2 at 7" centers; pitch increases northward to 64.4°.

Headroom depths apply to the central roof area; the east hip reduces usable width. Roof/loft supports and solar modules are conceptual.

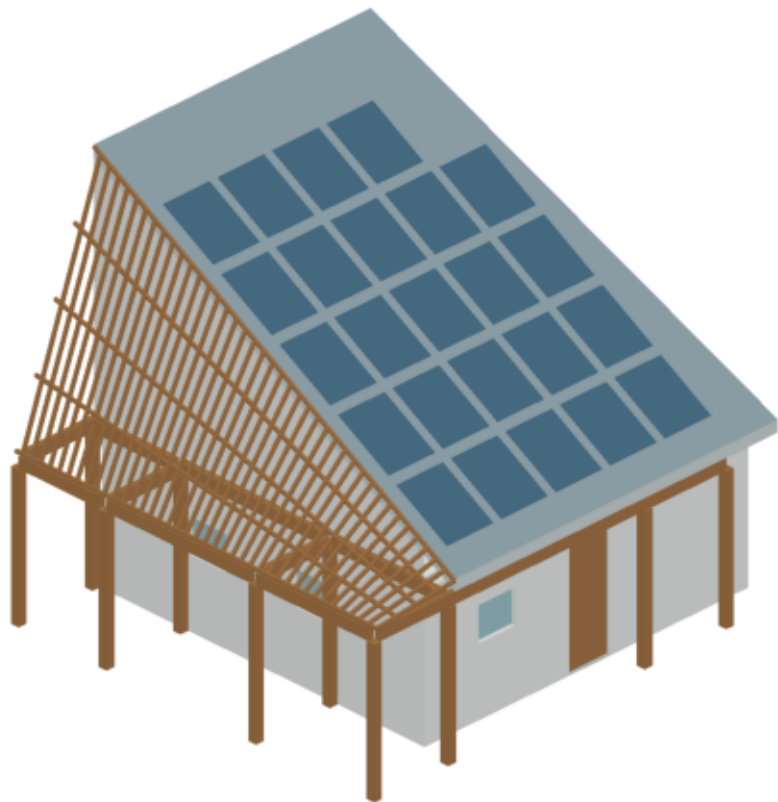

Roof follows beams: south 1' 11¼" beyond wall; north roof + loft wall 6" beyond existing wall. Loads and clearances remain unresolved.

B · 30° solar roof all the way north

GARAGE ROOF STUDY / Ground datum = 0' 0" / Loft headroom measured to underside of roof

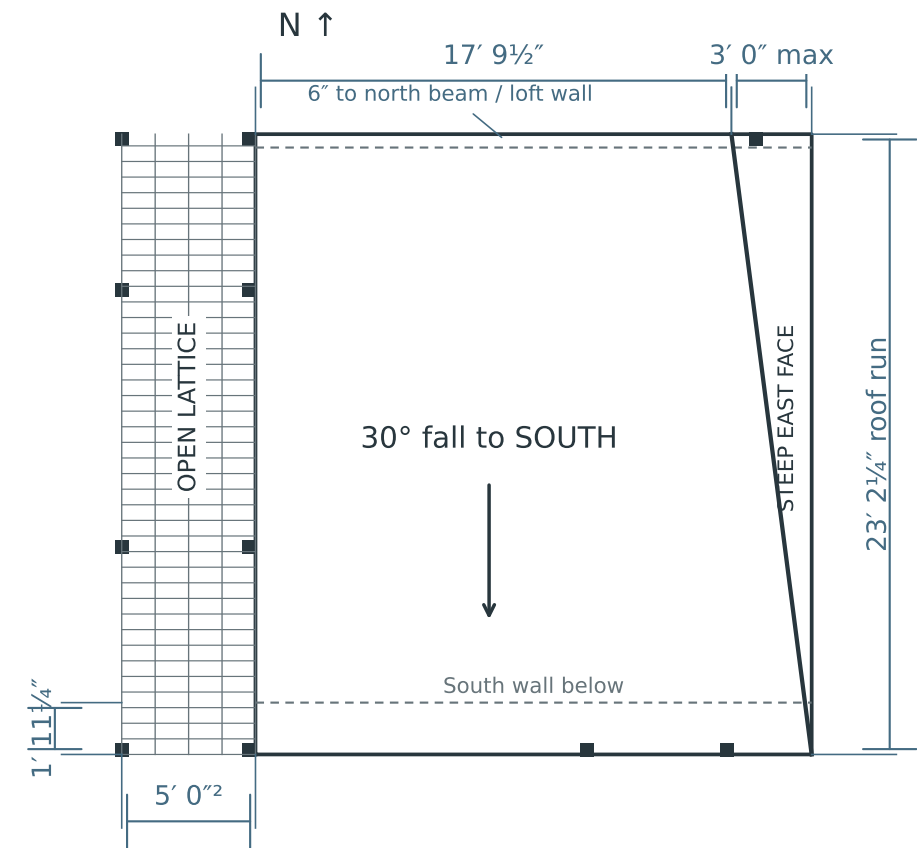

North roof top 22' 11¼" • Rear clear height 13' 4" • 8 ft+ zone: 9' 2¾" deep • 6 ft+ zone: 12' 8¼" deep

01 Southwest perspective

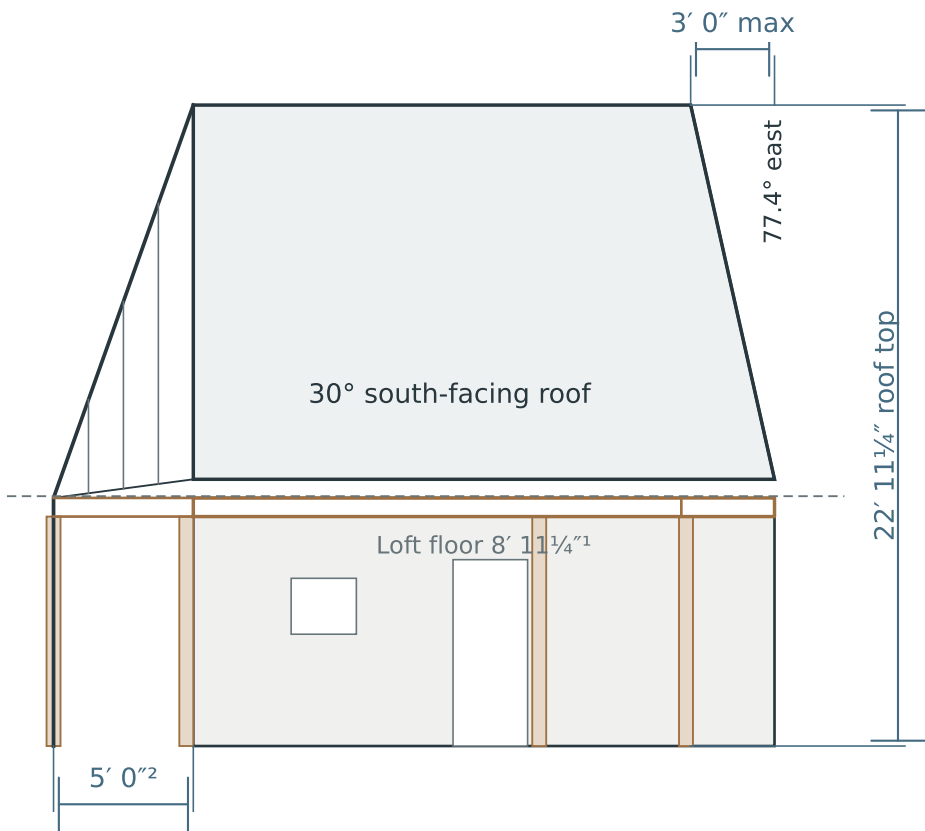

SOUTH: entry + window / WEST: open lattice

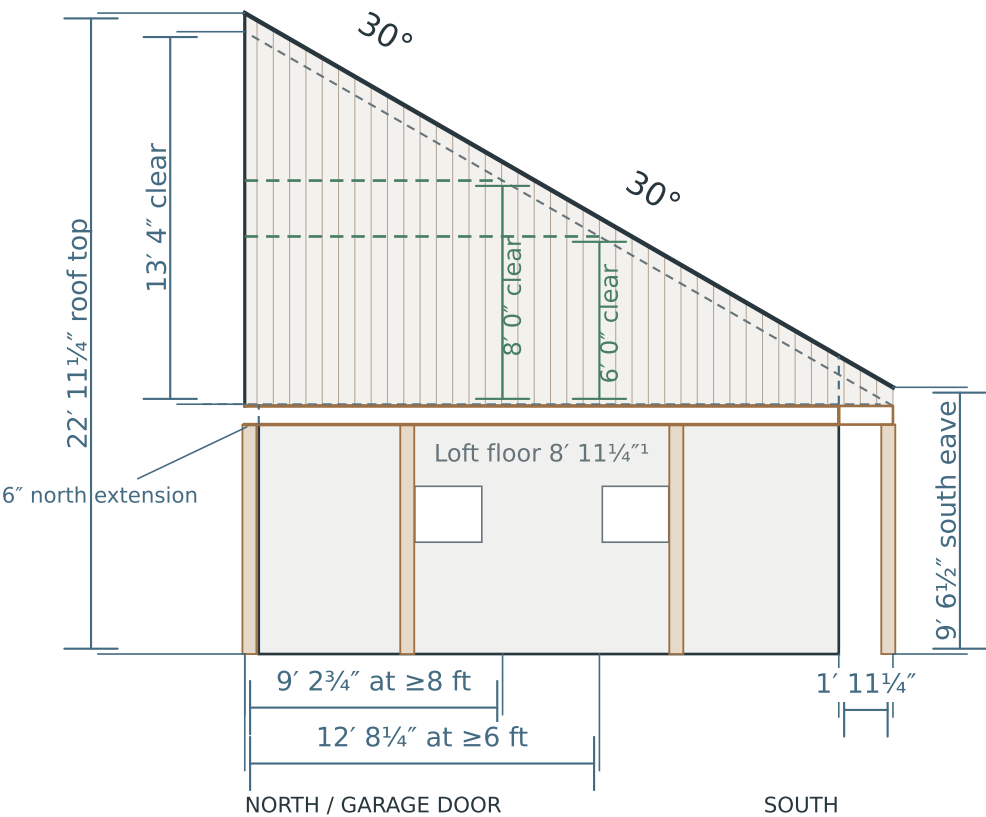

02 Roof plan · north up

03 South elevation · looking north

04 West elevation · looking east

¹ ASSUMED BUILDUP: 8' 2½" wall + 8" beam + ¾" deck → 8' 11¼" loft floor. Roof depth shown as 8" vertical; not sized.

² WEST: 5' 0" from wall to outboard post centerline. Lattice 2x2 at 7" centers; pitch increases northward to 70.4°.

Headroom depths apply to the central roof area; the east hip reduces usable width. Roof/loft supports and solar modules are conceptual.

Roof follows beams: south 1' 11¼" beyond wall; north roof + loft wall 6" beyond existing wall. Loads and clearances remain unresolved.
