

Roof-off plan · beams and cabinet support study

TRIAL LOCATION: EAST WALL · six leaves in three 48" pairs · north up, west left

* Assumed: 49½" begins at inside south-wall face; cabinet run on east wall. Confirm these before using the intersections.

Solid brown/orange: specified structural beams. All specified columns are structural supports on reported concrete pilings.

Pilings reported approximately 18" diameter × 36" deep. Cabinet-frame foundation details remain separate / unconfirmed.
